ACRONYMS & ABBREVIATIONS

OLF Outlying Landing Field

PFAS per- and polyfluoroalkyl substances

- OLF Holley (Holley Field) is a former OLF that has been inactive since the 1980s.
- Further investigation is underway because of potential uses of firefighting foam at Former OLF Holley (Holley Field).
- The Navy is following the well-established federal statutory/regulatory environmental cleanup process for assessment of and response to PFAS releases.
- 2 on-base areas have been identified as potential PFAS release areas.
- Findings are documented in a Preliminary Assessment Report, which will be completed in 2021 and available in the Administrative Record: <http://go.usa.gov/xAEQF>.

PFAS per- and polyfluoroalkyl substances

The Navy needs your help to sample your drinking water well.

- The sampling area includes properties within 1 mile in the direction of groundwater flow from the installation boundary.
- Although the runways were not identified as potential release areas, they were used to determine the sampling area to be conservative.
- If your drinking water is provided by Holley-Navarre or Midway Water System, the Navy does not need to sample your water.
- The Navy may expand the sampling area based on the results of the current sampling of drinking water wells.
